

OTD Oil Tan Delta Oil Tester

- **NEW OTD - Oil Tan Delta tester measures Tan Delta, Relative Permittivity and Resistivity of insulating oils**
- **Fully automated standard and user defined tests - Supports all international standards**
- **Integrated test cell heating and cooling systems**
- **Efficient oil fill and integrated automated oil drain facility**
- **IEC 60247 Innovative Test Cell - easy to assemble and clean**
- **Stores up to 50 records on-board and download to PC**
- **Compact and lightweight (22 kg / 48.5 lbs)**

DESCRIPTION

A new addition to the comprehensive range of Megger Oil Test Sets, the OTD measures Tan Delta, resistivity and relative permittivity of insulating oils.

The OTD is a fully automated tester and comes loaded with a set of international test standards:

- IEC 60247:2004
- IEC 61620:1998
- ASTM D924-08
- ASTM D1169:2002
- BS 5737:1979
- JIS C2101:1999
- VDE 0380-2:2005_01
- IS 6262:1971
- IS 6103:1971

As well as the international set of standards, the OTD supports up to six customer configurable test sequences.

Productivity in the laboratory is maximised, with the focus on reducing the test cycle time by fan cooling and inductive heating, together with an oil drain facility, negating the need to move the oil vessel.

The OTD has a 12 key alpha-numeric keypad to facilitate entry of test ID, filenames, notes, etc.

Test results are identified by a test ID and are time and date stamped. Megger's asset and data management software, PowerDB Lite, included at no extra cost, provides a tool for downloading results via the USB interface, while an internal printer provides hard copy results. Ink based printout ensures durability at all temperatures.

User safety is paramount and Megger have designed independent, dual redundant high voltage cut-off circuitry to ensure safety. During a test, press any button on the keypad to remove the high voltage immediately and abort the test.

The transparent lid provides ample visibility within the chamber.

APPLICATION

Monitoring and maintenance of oil quality is essential to ensure the reliable operation of oil filled electrical equipment. Codes of practice have been established in many countries that include tests for Tan Delta, Relative Permittivity and Resistivity.

Typical applications :

- New oil reception - quality test
- Regeneration of oil - quality test
- Monitoring and maintenance of oil quality in oil filled electrical equipment
 - Transformers
 - Switch Gear
 - HV Cables

FEATURES AND BENEFITS

- Keypad and a tabular designed user interface for efficient navigation and control
- Bright 3.5" colour display for ease of use
- Fully automated test sequences
 - 16 pre-installed international standards
 - 6 user programmable sequences
- 14 supported languages on the display
- Test Cell heating up to 110°C with uniformity across the cell - IEC 60247
- Oil drain facility - manual and fully automated micro processor controlled
- Minimal Test Cell components - easy to assemble and disassemble
- Safe operation with dual redundant micro switches
- Internal impact printer - automatically prints at the end of a test or manually if preferred
- USB download of stored results to PowerDB

ACCESSORIES

- Test Cell
- OTD-CC (Calibration Checker)

SPECIFICATIONS

Tan Delta

Measurement range	1x10 ⁻⁶ up to 4
Resolution	1x10 ⁻⁶
Accuracy	± 1% reading ± 1 x 10 ⁻⁵

Relative Permittivity

Measurement Range	1 up to 30
Resolution	0.01
Accuracy	± 0.5%

Resistivity Measurement

Range	2.5 MΩm up to 100 TΩm
Resolution	0.01

Test Temperature

Range	10 °C - 110 °C
Resolution	0.1 °C
Accuracy	± 1 °C

Test Voltage

AC Range	500 V - 2000 V 55 Hz
----------	-------------------------

DC Range	125 V - 500 V
----------	---------------

Quasi Rectangular Square Wave	100 V 0.3 Hz
-------------------------------	--------------

Resolution	1 V
------------	-----

Accuracy	±2% ±1 V
----------	----------

Power Supply	100 V - 240 V 50 Hz - 60 Hz 300 VA
--------------	--

Results Frequency

tan δ (Sin)	40 Hz - 65 Hz
Quasi	100 V 0.3 Hz

Environmental Specifications

Operating Temperature Range	0 °C - 50 °C (32 °F - 122 °F)
-----------------------------	-------------------------------

Storage Temperature Range	-20 °C - 55 °C (4 °F - 131 °F)
---------------------------	--------------------------------

Humidity	90% non-condensing
----------	--------------------

Dimensions	580 x 420 x 290 mm (22.8 x 16.5 x 11.5 inch)
------------	---

Weight	Instrument 22 kg (48.5 lb)
--------	----------------------------

Interface	USB Type B
-----------	------------

IP Rating	IP30
-----------	------

EMC	IEC 61326
-----	-----------

Maximum Altitude	2000 m
------------------	--------

Safety	IEC 61010 CAT II 300 V
--------	---------------------------

Test Cell

Capacitance Range	70 pF (± 3 pF)
-------------------	----------------

Weight	2.7 kg (5.9 lb)
--------	-----------------

Material	316L Stainless Steel / Quartz Glass
----------	-------------------------------------

For detailed measurement range and environmental conditions for accuracy values see the user guide.

Fully assembled Test Cell in the assembly stand with glass fill and riser funnels.

Tabular designed user interface for efficient navigation and control. Easy text input and concise display of test and configuration information.

OTD CC Calibration Checker enables accurate customer verification of Tan Delta and Resistivity values.

OTD CC provided in a toughened transport case. Available as an optional accessory.
