

## EGIL

### Circuit breaker analyzer

- Suitable for testing timing and travel on all circuit breakers with single interrupter per phase
- Extremely easy-to-use and reliable
- Two separate timing channels for measurement of auxiliary contacts
- Analog measurement channels for travel transducers or general voltage/current measurements
- Static and dynamic resistance measurements along with the SDRM201 optional accessory

---

#### DESCRIPTION

EGIL™, which incorporates benefits gained from experience with our larger instrument, is intended for circuit breakers with one contact per phase. Smaller and simpler, EGIL is equally versatile – and EGIL's price makes it attractive to small power plants. Moreover, it provides an ideal supplementary instrument for maintenance departments at large power companies.

EGIL is designed to test circuit breakers having one main contact per phase. Its three time channels are connected together on one side. Events at parallel contacts equipped with pre-insertion resistors are recorded and displayed simultaneously. There are two separate time channels for measurement of auxiliary contacts. To simplify on-site hookup, EGIL comes with ready-made multi-cable sets for both main and auxiliary contacts.

Coil currents are measured automatically and presented together with other readings immediately after testing on the display window or via the built-in printer. EGIL is easy to use – a built-in sequencer (program unit) sets the instrument automatically for the next sequential breaker operation.

Intended primarily for measuring travel (motion), the optional analog input channel finds many other uses as well. If this channel is not installed, all associated menu commands are hidden.

EGIL with the SDRM option together with the SDRM accessory enables static and dynamic resistance measurements.

EGIL can also be equipped with an optional USB interface for communication with a PC and the CABA Win™ Circuit Breaker Analysis Software.

## FEATURES AND BENEFITS

1. **Mains voltage changeover switch**, 115/230 V AC.
2. **SDRM (optional)**  
Static and dynamic resistance measurement. Interface for the SDRM201 accessory.
3. **Built-in coil current measurement**. Readings are presented on autoscaled graphs.
4. **Sequencer for coil signals** permits delays to be introduced for coil impulses that differ relative to each other.
5. **Three timing channels**. Both main contacts and pre-insertion resistor contacts can be timed on the same channel. Results are presented both graphically and numerically.
6. **Two galvanically isolated timing channels**. Can be used for timing of dry or wet auxiliary contacts.
7. **Optional analog input channel**, intended for measuring travel (motion) or any other analog voltage.
8. **USB (optional)** interface for PC. Supports communication with the CABA breaker analysis software.
9. **Built-in printer** features autoscaling, 114 mm (4,5") wide paper can be changed quickly and easily.
10. **Galvanically isolated sockets** ensure safe, reliable disconnection of operating coil cables before working in or on the breaker.
11. **Breaker state indicator**. Egil measures the state (open or closed) of the breaker, whereupon the sequencer sets the instrument automatically for the next sequential operation.
12. **Buttons for sequence** (C, O, C-O, O-C or O-C-O) settings and to run a print out of measurement results.
13. **Switch used to set the breaker** to the desired state without activating the measurement channels.
14. **Menu-driven procedures** automatically invoke default settings to eliminate time consuming presetting. All menu lines associated with uninstalled optional equipment are hidden to enhance simplicity. For the basic egil unit you simply connect the multi-cable sets and turn the MEASURE knob.
15. **MEASURE knob**. Runs a breaker operation sequence, measuring and recording the results.
16. **AUX 1 & 2 buttons** used for time channels that measure timing of auxiliary contacts. Contact sensing or voltage sensing can be selected.

	<p>The graph displays two traces: I (Current) and M (Motion). The vertical axis represents time from 0 to 300 ms. The horizontal axis represents distance from 0 to 220 mm. Traces for L1, L2, and L3 show closing and opening motions. Traces for X1 and X2 show their respective states during the main contact operations.</p>																		
	<b>Main contacts</b>																		
	<b>Auxiliary contact, trip circuit</b>																		

Example of report printed out on the built-in printer. Close-Open operation. Time, coil currents and travel (motion) were measured. (Travel measurement is optional.) The above example is 50% of actual size.

## APPLICATION

EGIL is intended primarily for testing high-voltage circuit breakers at medium-level voltages. There must not, however, be more than one break per phase since the time channels are not galvanically isolated. Contact times are recorded for main contacts, pre-insertion resistor contacts and auxiliary contacts. Coil currents are also recorded.

Besides the actual measurement values several parameters according to IEC standards are calculated and shown in the report, e.g. closing and opening time, difference between phases, over-travel, CO and QC time (and others).

## APPLICATION EXAMPLE

## IMPORTANT

**Read the User's manual before using the instrument.**

1. Ground EGIL using the included ground cable. Make certain that the circuit breaker is closed and grounded on both sides.
2. Connect the main contact cable set to EGIL and the circuit breaker.
3. Connect the auxiliary contact cable set to the a- and b-contacts on the operating mechanism.
4. Connect the EGIL sequencer to the close- and trip-coils and to the auxiliary voltage.
5. Remove the breaker's ground connection on one side.
6. You are now ready to proceed with the test. Simply turn the MEASURE rotary switch and read the results.

**SPECIFICATIONS**

Specifications are valid at nominal input voltage and an ambient temperature of +25°C, (77°F). Specifications are subject to change without notice.

**Environment**

*Application field* The instrument is intended for use in medium-voltage substations and industrial environments.

*Temperature*

*Operating* 0°C to +50°C (32°F to +122°F)  
*Storage & transport* -40°C to +70°C (-40°F to +158°F)

*Humidity* 5% – 95% RH, non-condensing

**CE-marking**

*EMC* 2004/108/EC

*LVD* 2006/95/EC

**General**

*Mains voltage* 115/230 V AC (switchable), 50/60 Hz

*Power consumption* 100 VA (max)

*Dimensions*

*Instrument* 360 x 210 x 190 mm  
 (14.2" x 8.3" x 7.5")

*Transport case* 420 x 300 x 230 mm  
 (16.5" x 11.8" x 9.0")

*Weight* 6.3 kg (14 lbs). 10 kg (22 lbs) with accessories and transport case

*Display* LCD

*Available languages* English, German, French, Spanish, Swedish

**Measurement section****Time measurement**

*Measurement time* 1 to 100 s

*Resolution* 0.1 to 10 ms

*Number of channels* 3 with common ground

*Time base inaccuracy* 0.05% of the reading  $\pm$  resolution

*Status thresholds*

*Closed*  $< 10 \Omega \pm 20\%$

*Resistor*  $10 \Omega \pm 20\%$  to  $3 \text{ k}\Omega \pm 20\%$

*Open*  $> 3 \text{ k}\Omega \pm 20\%$

*Open circuit voltage*  $24 \text{ V} \pm 20\%$

*Short circuit current*  $100 \text{ mA} \pm 20\%$

**AUX 1&2**

*Number of channels* 2, galvanically isolated

**Contact-sensing (Dry)***Status thresholds*

*Closed*  $< 600 \Omega \pm 30\%$

*Open*  $> 600 \Omega \pm 30\%$

*Open circuit voltage*  $20 \text{ V} \pm 20\%$  DC

*Short circuit current*  $25 \text{ mA} \pm 20\%$

**Voltage sensing (Wet)***Status thresholds*

*Open indication*  $< 8 \text{ V}$  (polarity insensitive)

*Close indication*  $> 13 \text{ V}$  (polarity insensitive)

*Working voltage* 250 V AC/DC

**Current measurement**

*Range*  $\pm 25 \text{ A}$  per channel

*Resolution* 25 mA

*Inaccuracy* 1% of the reading  $\pm 100 \text{ mA}$

*Working voltage* 250 V AC/DC

**Breaker operation**

*Sequences* C, O, C-O, O-C, O-C-O

*Continuous current* 5 A

*Max current* 25 A during 300 ms, rest time 1 min

*Contact function* Two independent control functions

*Contact characteristics* Non bouncing, closing time max. 0.1 ms

*Make/Break capacity* 25 A, 250 V (AC or DC) per contact function

*Start breaker operation* By rotary switch

*Pulse length* Adjustable in steps of 10 ms

*Pulse delay* Adjustable in steps of 10 ms

*Working voltage* 250 V AC/DC

**Motion (optional)**

*Number of channels* 1 independent

*Max cable length* 10 m (33 ft)

**Input**

*Range* -4 V to +4 V

*Resolution* 2 mV

*Inaccuracy* 1% of the measurement range

*Transducer resistance* 1 k $\Omega$  to 5 k $\Omega$

*Input impedance* 150 k $\Omega$

**Output**

*Open circuit voltage*  $4,095 \text{ V} \pm 4 \text{ mV}$

*Short circuit current* 115 mA

**Printout**

*Type of printout* Graphic and numeric

*Printer* Thermal printer with fixed print head

*Graphic resolution* 8 dots/mm – 203 dpi

*Paper width* 114 mm (4.5")

**ACCESSORIES**

Time measurement cables, GA-00160

Time measurement cables, GA-00170

Cable set for sequencer, GA-00082

Cables included in items: BM-19090, BM-19092, BM-19093 and BM-19095

Transducer cable GA-00041

Extension cable XLR, GA-00042

Cables included in items: BM-19093 and BM-19095

**OPTIONAL ACCESSORIES**

Extension cable XL, GA-00150

Transducer cable GA-00040

The SDRM201 is intended to use for both static and dynamic resistance measurements (SRM and DRM) on high voltage circuit breakers or other low resistive devices.

The SDRM Cable

Current cables for SDRM201, the red cable is 3.0 m (9.8 ft) and the black one is 0.5 m (1.6 ft)

Linear transducer, TLH 225

Linear transducer, LWG 150

Linear transducer, TS 25

Rotary transducer, Novotechnic IP6501 (analog)

Universal support

Switch magnetic base

Rotary transducer mounting kit

Voltage divider, VD401

Cable reels, 20 m (65.5 ft), 4 mm stack-able safety plugs

## ORDERING INFORMATION

Item	Art. No.	Item	Art. No.
<b>EGIL Basic unit</b>		<b>Transducer mounting kits</b>	
Incl:		<b>Universal kits</b>	
Time measurement cables	GA-00160, GA-00170	Rotary transducer mounting kit	
Cable set for sequencer	GA-00082	For transducers XB-31010 and XB-39130	XB-51010
Transport case	GD-00190		
<b>EGIL with USB port</b>		Universal transducer mounting kit for linear and rotary transducers	XB-51020
Incl:		<b>Ready-to-use-kits – Rotary</b>	
CABA Win	BL-8206X	Incl. transducer XB-31010, mounting kit XB-51010	XB-71010
